

Mobile lifting solutions that improve your working environment manufactured in Sweden

Electric battery operated mobile lifting solutions with tools, adapted to your

Lift trolleys to be able to handle, lift and rotate various goods in a safe, efficient and ergonomic way. The lift trolleys are divided into three different series, **P**, **IE** and **E**, and they offer a lot of customization options.

The P-trolleys are the most flexible and prepared for customer adaptations. We offer a wide product range and there is a large number of standard tools. The lift trolleys are usually electrically battery powered.

The lift trolleys are user-friendly and require very little service and maintenance. The lifting column has a screw drive, which makes the trolleys very reliable and durable for many years of use. All lifting trolleys have a built-in release function that acts as a tipping and crushing protection. The function automatically disengages the lowering movement if the load is obstructed during lowering.

All lift trolleys are available in painted and stainless steel versions as well as in ESD versions.

P-trolleys for load capacities up to 325 kg

Our completely modular family member, a unique, modular concept forms the basis of our P-trolleys, giving you and us virtually unlimited opportunities to create a lifter which is perfectly suited to your needs. We offer chassis of variable widths, heights and lengths as well as custom made ones. Personalise your lift trolley to meet the handling requirements in your premises.

The load capacities are **90 kg, 130 kg, 175 kg 225 kg or 325 kg**.
All this with the best ratio between own weight and load weight.

The lifting columns can be supplied in different standard heights, but can also be custom made to provide the exact desired stroke. As an alternative we also offer a telescopic lifting column that enables you to double the lifting height. In order to best adapt the trolley to the particular needs of different working environments, we provide wheels in various sizes and materials. In addition to the central brake, the P-trolleys also have a directional lock on the rear wheels.

Flexibility - choose mast height, width and length och legs

The range of models offer many different possibilities because they can be customized. So you can get a trolley that meets your needs perfectly.

**P-trolleys are based on modular design,
therefor they can be adapted to your requirements**

The load capacities are 90 kg, 130 kg, 175 kg, 225 kg or 325 kg.

90IE stable and efficient lifting trolley for handling weights up to 90 kg

These are stable, manoeuvrable lift trolleys with a low weight, which can be equipped with a number of different tools. 90IE is adapted to and ideal for personnel with frequent goods handling. The lift trolleys is flexible and stable and very user-friendly, the durable quality construction demands minimal maintenance. This chassis outside width is only 555 mm.

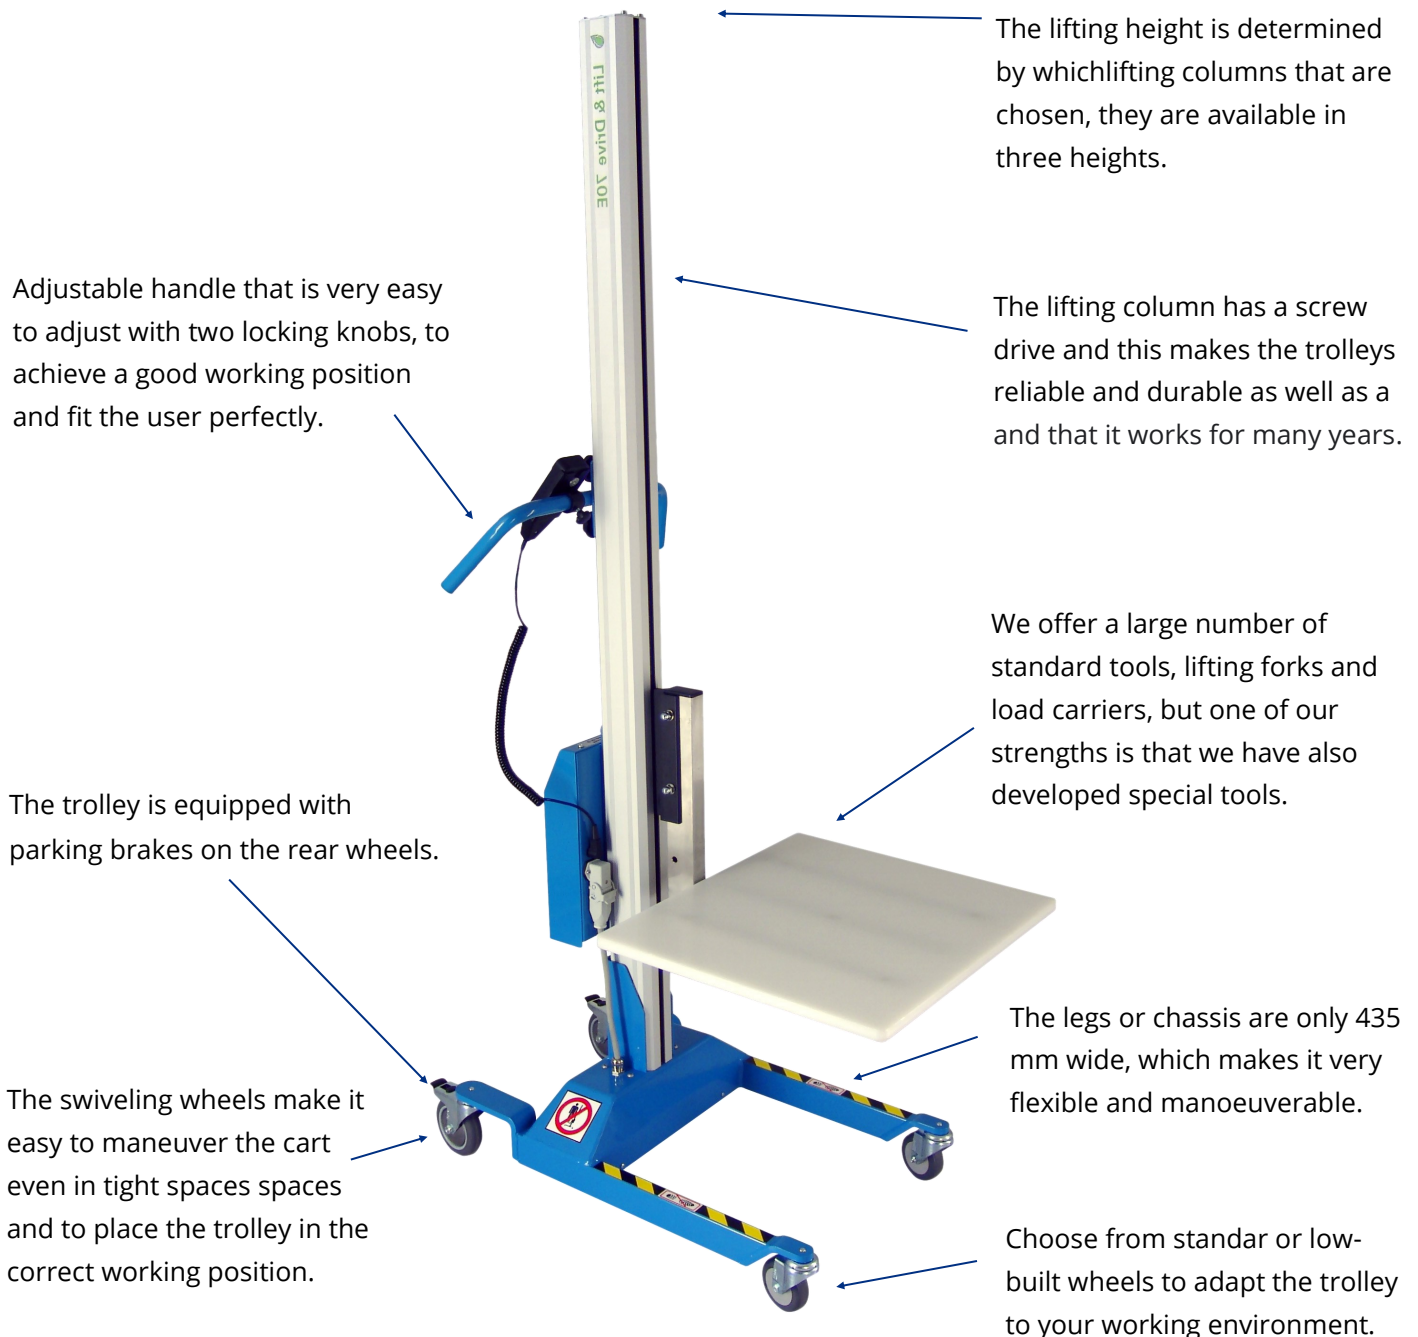

The tools are raised and lowered with a control box. The control boxes are available in two variants, with two or four buttons. Four buttons for slow maneuvering.

The control boxes are detachable from their holder on the handle, this makes it possible to raise and lower the tool even when the work is carried out in front of or on the sides of the lifting trolley.

90IE is available in painted and stainless steel versions as well as in ESD

70E and 90E are our light weight and slim lift trolleys in load capacities of 70 and 90 kg

The tools are raised and lowered with a control box. The control boxes are available in two variants, with two or four buttons. Four buttons for slow maneuvering.

The control boxes are detachable from their holder on the handle, this makes it possible to raise and lower the tool even when the work is carried out in front of or on the sides of the lifting trolley.

90IE is available in painted and stainless steel versions as well as in ESD versions.
